

SCIENTIFIC GAMES AND GROUPE FDJ DEBUT LOTTERY GAMES OF THE FUTURE

Global Lottery Industry Leaders Partner on Innovative *iDecide* Games Where Players Can Decide to Stake Physical Game Winnings in Digital Game Play

ATLANTA – October 12, 2022 – [Scientific Games](#) and [Groupe FDJ](#), the operator of France's national lottery [La Française des Jeux](#), unveiled *iDecide*, a revolutionary lottery game enhancement that gives instant scratch card players the option to continue their play experience with a digital game and potentially expand their winnings. The concept is a first for the global lottery industry.

The debut of *iDecide* comes days before the [World Lottery Summit](#) in Vancouver, where demonstrations will be hosted by Groupe FDJ and Scientific Games, partners on the innovation.

Here's how it works: Each instant scratch card game featuring *iDecide* has a QR code and a callout promoting the opportunity to continue playing. If a player wins on the physical card, they can decide to cash their winning ticket at retail or wager a portion or all their winnings in a digital game. The *iDecide* digital game is accessed by scanning the QR code with a mobile device. To increase winnings, the player must successfully advance through the digital game. Advancement is randomly determined by the decisions the player makes during the digital game.

Xavier Etienne, Executive Vice President Technology and International for FDJ, said, "*iDecide* easily connects lottery players from an instant scratch card game sold at retail to the digital channel. These unique products were strategically developed to connect physical and digital game play with a focus on providing a unique digital entertainment experience for players while preserving FDJ's strong retailer network. There has never been anything like *iDecide*, it is truly a product of the future for the global lottery industry."

iDecide games are secure and maintain the integrity and pre-defined prize structure of the physical game. Digital player registration is not required. All prize winnings from both the physical and digital games are redeemed at a lottery retailer. If the player wishes to end play with the physical game, any winnings may be redeemed instantly. If the player decides to move to the digital game, the winning will be automatically updated with the outcome of the digital game.

Jeff Martineck, Senior VP of Global Lottery Product Innovation for Scientific Games, said, "Games featuring *iDecide* modernize the lottery experience for the consumer. These unique games put the power of choice into the consumer's hands, moving them seamlessly from retail to digital as they decide how deeply they want to play and win. Best of all, *iDecide* games firmly connect lottery retailers to the digital channel, maximizing revenues and contributions to lottery good cause programs."

iDecide is a proven innovation, with FDJ launching three games featuring the enhancement across its network of 30,000 retailers in France. Additional testing with consumer research groups was also conducted by Scientific Games to confirm the potential is universal.
